

OFFICINE PANERAI

Luminor 40/42/44 mm BA

Radiomir 1940 42/45 mm BA

Alligator shiny purple, dark pink, red

Material features

The Alligator shiny is one of the most sophisticated materials used for the luxury watch-industry. Through a complex manual surface refinement, the high valued Alligator leather is polished to its fascinating brilliance (by an agate stone).

The extraordinary shine gives the unique elegance and noblesse to this bracelet and makes it an ideal attendant for special moments. Due to the delicate surface the bracelet may change its appearance in every day use (e.g. change of colour intensity especially with pastel colours).

Bracelet features

- Rembordé Technology with lacquered edges – offers the benefits of longevity, constant aesthetics and a pleasant wearing-comfort
- embossing line on the upper leather as well as on the loops
- contrast stitching
- safety stitching on the loose loop and the attachment
